THE MISSING LINK BETWEEN THE ARCHITECTURAL/DESIGN WORLD AND MODERN TECHNOLOGY

WHAT YOU SHOULD KNOW:

- Specializes in software training for all design professionals and design students.
- Intensive, hands-on training for groups, as well as individual students; customized to support design specialties, to assess skills and office work-flow procedures, and the latest release of each program is taught.
- Practice also includes architectural presentation technology and animation, production of construction documents, facilities management, database design and migration, as well as residential, commercial and retail architectural design and interior design.
- Acts as architectural production and design team to completely manage and produce unique projects, and create CADD working drawings.
- Offers on-call technology problem solving for all programs.
- Teaches free seminars each month for design software users.

CLASSES OFFERED IN:

- Autodesk® products such as **AutoCAD®** and **Architectural Desktop™**
- Macromedia® products such as **Dreamweaver®** and **Flash™**
